

Windows 10 End-of-Life

OVERVIEW:

Microsoft will **stop providing technical assistance, feature updates, and security updates** for **Windows 10** on **October 14, 2025**. As a result, your system may become vulnerable to cyberattacks, malware, and data breaches. Continuing to use Windows 10 after October 14 may also mean your system does not comply with federal and provincial health information regulations, potentially resulting in legal and financial penalties. Learn more about upgrading to Windows 11 below:

EXTENDED SECURITY OPTION:

Although technical assistance and feature updates will stop, Microsoft is currently offering users an option to keep receiving critical security updates for Windows 10. Click [HERE](#) to learn more about the extended security deadline.

HOW TO CHECK YOUR WINDOWS VERSION

- ◆ Press the Windows Key + R to open the Run dialog
- ◆ Type 'winver' and press Enter
- ◆ A window will appear showing your Windows version and build number
- ◆ If you are running on a Windows 10 version, you will need to upgrade

CAN I UPGRADE MY CURRENT DEVICE?

- ◆ Download and run the [PC Health Check tool from Microsoft](#).
- ◆ The tool will let you know if your device meets the requirements for Windows 11

**ARE YOU NEEDING TO BULK PURCHASE NEW DEVICES
AND/OR RECYCLE OLD DEVICES THAT ARE NOT UPGRADABLE?**

Contact the [Doctors Technology Office \(DTO\)](#) for assistance with all
of your Windows 10 end of life needs!
